Inviton
event management solution

Organize successful events & sell tickets online
DATASHEET

Sell tickets online

- Custom ticket-selling page
- Unlimited ticket amounts and types
- Customizable ticket purchase form with additional fields if needed (name, surname, age)
- Registration forms with easy integration
- WYSIWYG ticket designer
- Various means of purchasing tickets
- Promo codes

Access control

- QR-scanning based access control
- Mobile scanning app for Android and iOS
- Dedicated scanning hardware rental
- Advanced offline capabilities (application has a fully fledged synchronized internal database)
- Possibility to divide event into access zones (VIP, Backstage)
- RFID visitor tracking
- "Subevent"-based access control possibility (screens at movie festivals, VIP saloon, conference panels)
- Food / drink control
- Cashless credit system for festivals

Guestlist - Tablet attendee list

- Complex tablet-based solution the attendee lists
- Elegant solution for guestlist collection to prevent endless Excel and email merging
- Create guestlists, define how many visitors a partner is allowed to add and leave the rest to them
- Effectively prevents haggling with partner tickets
- Ability to only add an attendee or to send them an RSVP invitation
- Tabled attendee list software, a solution worthy of this era

Registration forms

- Simple and intuitive registration forms creator
- Form data is and always will be in your ownership
- Possibility to create dynamic value-driven forms (if the field value is Yes, then show another field, otherwise hide, etc.)
- Simple integration using either customizable iframe elements, or our simple API
- Full support of Google Analytics and Facebook Pixel

Onsite attendee registration

- Identification either using QR codes, or by searching an online attendee list using an attendee's name or other identificator
- Check-in using either the mobile app, or directly from the web browser
- Personalized badge printing (plastic card, badge, wristband…)
- In case of server connection loss, the application can use its offline database and synchronize once connection is regained
- Realtime "LiveFeed" check-in allows effective separation of duties
- Possibility to rent our pre-configured registration kiosks

On-site badge and plastic card printing

- Plastic card printing (with or without a photo)
- Badge creation (badge with name, plastic card, wristband) at the event
- Plastic card printing directly from within the tablet application
- Web application for guest registration / badge printing
- POS ticket sale

Event mobile applications

- Event mobile app creation
- Native applications for iOS, Android & Windows
- Connected to the portal - helps to avoid double data entry when creating the app and the event
- Various app modules - schedule, timeline, performance list, photowall, faceswap, tickets inside the app, event partners, FAQ, static pages and more

Other services

- Online sales stats
- Online attendee stats (how many people and who specifically, access zone load graph….)
- WYSIWYG template designer for tickets, email, invitations…
- Marketing newsletter management
- Attendee import (manual or from an Excel file) and management
